Anna Luetticke
was 15 years old
when she lost her
little brother
Charles Lee

Anderson to Tay-Sachs. Charles Lee
was 2 1/2 years old. Anna
demonstrated maturity beyond her
years in her thoughtful essay about
how having a sibling with Tay-Sachs
impacted her life.

Anna wrote in her essay writing:

*Everything I do, I do in honor of
Charles Lee. When I am taking care of
a patient, I treat him or her as if they
were part of my own family. Charles
has given me the ability to look past so
many things and to remember to treat
others as I would want to be treated,
or in this case, as I would want my
family members to be treated. There
are days when this is easier said than
done, but when I glance down at my
wrist and see Charles' bracelet that I
have worn everyday for the past five
and half years, it is an instant
reminder. Everyone deserves the
chance to live the best life that they
can during the time they are allotted
here on Earth.*
